

Burning Issues CD Installation Instructions

1. Place the Burning Issues CD into your CD drive.
Click on the "My Computer" icon on your desktop.

2. Click on the CD drive icon, mine is the "D" drive.

3. The CD directory will show up on your screen.

4. Acrobat Reader and QuickTime are available to copy to your computer in these folders.

However, I would recommend loading the newest versions of these programs by accessing the links to their websites included on your course CD. These are free downloads.

5. The Read Me file has important information regarding operating this program.

6. The Adobe Acrobat PDF files have copies of the Educator's Guide and the Student's Field Notebook. Print your own copies at will. The data folder and xtras folder are not needed by users.

7. From the CD directory page, click on the flames folder.

8. Click on the Setup Button with the computer icon, not the arrow icon.

Follow instruction on the screen.
You will need this portion of the program loaded to the computer running the CD in order to run the flames activities.

9. You are now ready to begin the program. From the CD Directory click on the Start button, this is the Movie projector icon.

10. The Burning Issues Movie should begin to play. If you get a big box with a big X instead of lightning, you will need to install the proper version of QuickTime, 4.0 or higher.

11. After the movie, you will end up in the National Inter-agency Fire Center, also known as NIFC, hallway.

To navigate, hold down the left button on your mouse and move left or right.
This will take you 360 degrees around the hall.

When the cursor lands on something that is linked, it will turn into a symbol that looks like a pointing hand with a target.

Place your cursor on the Briefing Room door, which is the one hidden in the shadows shown in the image, and click.

12. You will now be in the briefing room. Listen to the instructions.

Click on the table in the center of the room. Remember, the cursor will turn into a hand when you run it over a link.

A movie will begin to play. At the end of the movie, you will be given a code. You will need this code to continue.

13. You will now be taken back to the hallway. Hold down the left mouse button and drag to move left or right. Find the Airstrip door.

Enter by placing the cursor on the door and clicking your mouse.

14. Now you will be asked to enter that code you received in the briefing room. Do this by clicking on each letter in order. E-R-I-F

15. After the code has been accepted, you will be on the air strip.

This is the point at which you will enter each of the different activities.

Scroll 360 degrees to access vehicles that will transport you to each of the four areas or click on the building with the American flag to re-enter the NIFC hallway.

Enjoy!
